

## BBM

### *Trading partner*

As the procurement company of MIVA we are experts in purchasing and transporting motor vehicles.

As service provider we realise technological-ecological infrastructure projects.

As logistics provider we deliver relief supplies throughout the world.

We offer our experience and expertise.

And forego any profits.

## BBM

### *Trading partner*

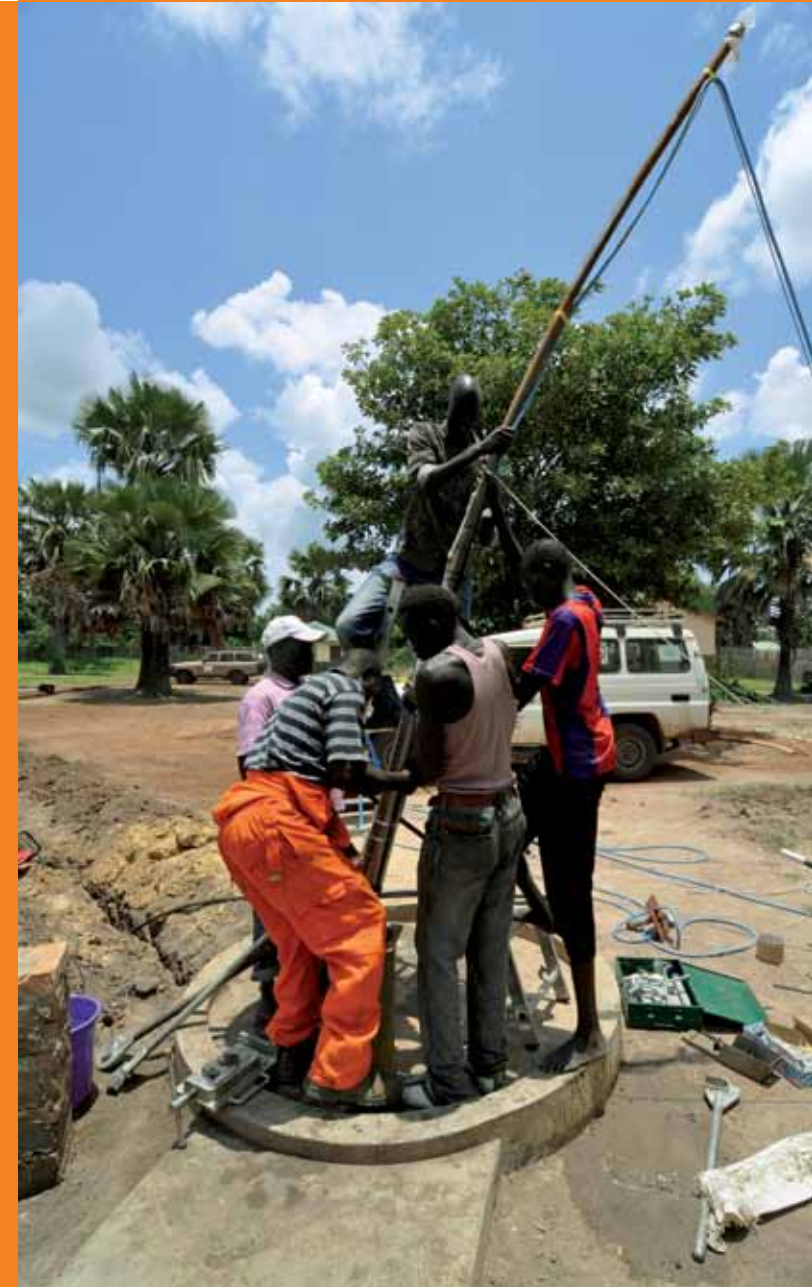

BBM serves as procurement company, trading partner and service provider for people active in the poorest countries of the world.

We support relief organisations in the area of development cooperation.

At what price?

We merely charge a contribution to cover our original costs.

## BBM

### **Motor vehicles**

We purchase vehicles for relief organisations and charitable institutions, most notably in structurally weak regions in Africa, Latin America and Asia.

The models are delivered in corresponding country versions, along with additional equipment (winch, bull bar, etc.) provided on request.

Due to direct import from manufacturers we can pass on any cost reductions to customers.

We offer off-road vehicles, trucks, tractors as well as agricultural equipment.

## BBM

### **Infrastructure projects**

We provide sustainable technologies and realise major environmental projects.

In particular we specialise in

- > **Energy:** photovoltaic systems, uninterrupted power supply, energy management, transformer stations
- > **Water:** pump systems, utilisation of rainwater, hot water
- > **Hygiene:** dry toilets, constructed wetlands, industrial laundries, waste disposal

If required, we offer total construction management including planning, delivery, installation, training of personnel and continuous support.

## BBM

### **Aid shipments and logistics**

We purchase relief supplies, arrange for interim storage and packaging ready for sea or air freight along with transportation to locations throughout the world.

We produce export and import documents and attend to arranging transport insurance.

We offer our assistance with questions regarding customs and import regulations as well as applications for exemption.

We help reduce costs by grouping individual shipments in consolidated containers and with bulk shipments.
